Marrriages—their Number and Proportion to the Population,	v
Minors, Widowers and Widows, and Signatures to Marriage Registers,	v
Ages of Persons Married,	vi
Proportional Number (1) of Marrriages, (2) of Persons Married who wrote their Names in the Registers, (3) of Persons not of Full Age, and (4) of Re-marrriages, in each Registration Division in 1864, 1865, and 1866. (Table I.),	vii
Marrriages (1) of Roman Catholics, (2) of Protestants, and the total Number registered in each Quarter of the Year,	viii
Marrriages of Protestants from 1845 to 1866, celebrated according and not according to the Rites of the Established Church. (Table II.),	viii
Buildings registered for the Solemnization of Protestant Marrriages. (Table III.),	ix
Marrriages by Registers' Licence, and by Presbyterian Ministers' Licence,	xi
Births registered in 1866,	xi
Deaths registered in 1866,	xii
Emigration from each Province during the year 1866,	xii
Meteorological Observations,	xiii
Remarks on the progress of Registration,	xiii

SUMMARY OF THE QUARTERLY REPORTS, 1866:

First Quarter, ending March 31st,	xv
Second Quarter, ending June 30th,	xix
Third Quarter, ending September 30th,	xxiv
Fourth Quarter, ending December 31st,	xxix
Topographical Description of the Eight Divisions,	xxxv
Estimated Population of Ireland from 1801 to 1866,	xxxvi

ABSTRACTS:—

Marrriages registered in Ireland in each of the Divisions and Superintendent Registers' Districts, also in each Province and County, in 1866, distinguishing Roman Catholics from Protestant Marrriages, and giving the Total Number registered in each Quarter of the Year; the Canonical Condition of Persons Married; the Number of Minors, and of those who signed the Registers by Marks,	2-11
Ages of 25,784 Persons married in 1866, distinguishing those of Bachelors, Spinsters, Widowers, and Widows,	12, 13
Marrriages, Births, and Deaths registered in each of the Divisions and Superintendent Registers' Districts, and in each Province and County in 1866; also Births and Deaths, and Excess of Births over Deaths in each of the Registers' Districts of Ireland, distinguishing the Sexes and Illegitimate Births throughout,	14-38

	Page
Births registered in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties (distinguishing Males and Females) in each of the Four Quarters of 1866,	46-49
Deaths registered in each of the Four Quarters of 1866 (distinguishing Males and Females), in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties,	50-59
Deaths of Males and Females at different Ages registered in 1866, in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties,	60-67
Causes of Death of Males and Females in Ireland, at different periods of life, in 1866,	68-75
Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1866,	76-79
Causes of Death of Males and Females in Ireland, and in each of the Divisions in 1866,	80-87
Deaths from several Zymotic and other Causes in 1866, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties,	88-91

APPENDIX.

Letter to the Registrar-General on the Causes of Death in Ireland in 1866, from WILLIAM M. BURKE, Esq., F.R.C.P.,	95-98
Copy of Circular relating to Registration of Roman Catholic Marriages,	98

Index of Superintendent Registrars' Districts, and of Registrars' Districts,	99-105

REPORT

TO

His Excellency JOHN POYNTZ, EARL SPENCER, K.G., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49, the 26 & 27 Vic., cap. 90, sec. 16, and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Excellency, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1866.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1866, was presented to Parliament in the Session of 1867. The Report now submitted contains detailed Tables of the ages and condition of persons married, of Births, distinguishing legitimate from illegitimate; and of Deaths, and their causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 772 Registrars' Districts, which, with a few exceptions, are of equal extent with the Dispensary Districts formed under the Medical Charities Act.

GENERAL SUMMARY.

The *estimated* population of Ireland in the middle of 1866 was 5,582,625; the persons whose marriages were registered, amounted to 60,242; the number of marriages being 30,121; children born alive whose births were registered, amounted to 146,090; and the number of deaths registered was 98,027. The emigrants from Ireland during the year 1866 amounted to 99,467. In the previous year—1865—there were *registered* 30,802 marriages, 144,970 births, and 93,154 deaths; the number of emigrants was 101,497.

MARRIAGES.

30,121 marriages were registered during 1866, being in the proportion of 540 marriages to every 100 persons, or of 1 marriage to every 185 persons, of the *estimated* population. The ratio in England was 1 in 113, or 885 per cent., and in Scotland 1 in 133 or 751 per cent. of the *estimated* population.

922 men and 4,613 women contracted marriage before they had attained their twenty-first year. The proportion of males married under age was 3.06; of females, 15.31 per cent. The proportions in England and Wales in 1866 were—males, 6.69, and females, 20.03 per cent. In Scotland the proportions were 7.20 males and 20.69 per cent. females.

Of widowers, 3,180, and of widows, 1,691 were re-married; the proportion being 10.56 per cent. of widowers, and 5.61 per cent. of widows,

to the total marriages. The like proportions in England and Wales were 13·91 widowers, and 9·40 per cent. widows. In Scotland the proportions were, widowers, 11·96, and widows, 5·60 per cent.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who make a mark. Of 60,242 persons married in 1866, 26,596 (11,630 men and 14,966 women) signed the registers with marks; being in the proportion of 44·1 per cent.—38·6 per cent. of the males, and 49·7 per cent. of the females married.

The like rates in England and Wales for the same year were 21·6 per cent. of males, and 30·0 per cent. of females; and in Scotland 11·22 of males and 22·00 per cent. of females.

The marriage registers contain a column in which the age of each of the parties married is inserted; but as the law only requires it to be stated whether the parties are "of full age" or "minors," the precise age at marriage is not always entered in the registers. In 1866 the exact ages of both parties were given in 12,892 instances. Of these 11,619 were bachelors, and 12,265 spinsters; 1,273 were widowers, and 627 widows. The largest number of wives was married between 21 and 30—the number being 7,985, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—7,914—is also found to have been married between 21 and 30 years of age.

298 bachelors were married to widows, both of whose ages at the time of marriage are recorded. Of these, 160 of the widows and 140 of the bachelors married between 25 and 35 years of age. Of 944 widowers who married spinsters, 430 of the latter were between 25 and 35 years of age; whilst the largest number of the widowers on their re-marriages ranged chiefly between 30 and 45.

Of widowers and widows married, whose ages at the time of marriage are stated, there were 329 couples. Of these the largest number of widows appears to have been between 40 and 50, and of widowers between 50 and 60. 12 widowers and 1 widow were married when they were above 70 years old.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap. 90, directs that parties about to contract marriage shall produce to the clergyman celebrating the marriage a certificate, to be procured from the Registrar, filled up as far as possible by that officer with the particulars necessary to be registered, which certificate the parties married, the witnesses, and the officiating clergyman are required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, and at the special request of several dignitaries of the Roman Catholic Church,—with the approval of the Law Officers of the Crown—(who at that time were the Right Hon. Thomas O'Hagan, M.P., and James A. Lawson, esq., Q.C.)—I instructed the District Registrars to furnish to each parish priest, who should apply for them, forms of certificate to be duly filled, signed, and forwarded to the Registrar on the occasion of a marriage, thus saving the husband the inconvenience of procuring from the Registrar a form of certificate *previous* to his mar-

riage, as required by the Statute.* I also furnished all the Roman Catholic clergy in Ireland with copies of the Act above referred to, in order that the requirements of the law might be known to them previous to coming into operation.

The proportion per cent. of marriages to the estimated population, and of persons married who wrote their names in the registers; also of minors, widowers, and widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Proportional Number of Marriages in the Eight Divisions of Ireland during the years 1864, 1865, and 1866, of Persons who Signed their Names, of Persons not of Full Age, and of Re-marriages.*

No.	Registration Divisions.	Marriages to 100 of the Estimated Population.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.	
			Of 100 Men Married.	Of 100 Women Married.	Of 100 Men Married.	Of 100 Women Married.	Widowers.	Widows.
							Of 100 Men Married.	Of 100 Women Married.

The extent and position of each of these divisions are specified at page xxxv.

Of the total number of marriages registered (30,121) 21,211 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 8,910 marriages were of the various Protestant persuasions. Of the latter marriages 5,006 were in churches and chapels of the Established Church, 2,697 in Presbyterian Meeting-houses, 245 in "Registered Buildings," 946 in the Registrars' offices, 14 according to the usages of the Society of Friends, and 2 marriages were of members of the Jewish persuasion. Of the entire number of marriages in 1866 there were contracted in the quarter ending the last day of March, 11,992; of June, 6,081; of September, 5,566; of December, 6,482.

* For copy of Circular issued on this subject, see page 80.

The following table gives a statement showing in continuation of the return in my report for 1865, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1866, and the Mode in which the Marriages were solemnized.*

Years ended 31st December	Marriages.												
	According to the Rites of the Established Church.						Not according to the Rites of the Estab- lished Church.

1866	12	4,868	968	18	8	5,065	2,637	213	960	14	—	3,984	9,910

There is not any return made to me of the places of worship belonging to Roman Catholics in which marriages are celebrated; but under the provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting other religious persuasions, that there were 1,458 Churches and Chapels of the Established Church, 574 registered Presbyterian Meeting-houses, and 200 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1866. During the year 1866 there was an increase of four in the number of such places in the Established Church; and of eight in other religious communities. The "Registered Buildings" belong to the following denominations:—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists,	108	Methodists New Connexion,	5
Reformed Presbyterians,	33	Church Methodists,	1
Independents,	20	Covenanters,	1
Baptists,	11	Evangelical Union,	1
Seceders,	10		
United Presbyterians,	5	Total,	200
Moravians or United Brethren,	5		

* The 7 & 8 Vic., c. 81, came into operation 1st April, 1845.

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages (under the 7 & 8 Vic., cap. 81) may be solemnized in each District or Union, distinguishing the religious denominations:—

During the year 1866 there were issued by the Registrars, 744 Licences for Marriage in Registered Buildings, and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1866.	Number of Registered Meeting-houses on 31st December, 1866.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	116	634	3,642
2. Synod of Ulster,	8	21	48
3. Presbytery of Antrim,	4	10	24
4. United Presbytery or Synod of Monaghan,	4	4	—
5. Northern Presbytery of Antrim,	1	5	11
Total,	133	674	3,725

BIRTHS.

The births registered in Ireland during 1866, amounted to 146,090. Of these, 75,095 were males, and 70,995 females, being in the proportion of 105·8 boys to every 100 girls. In England, in the same year, the number of males to 100 females whose births were registered was 104·3; and in Scotland 105·5.

The rate per cent. of births to the estimated population was 2·617. In England the rate was 3·554, and in Scotland 3·60.

There were 4,569 illegitimate births, of which 2,506 were those of males, and 2,363 females; the proportion to the total number of births being 3·3 in every 100. The rate in England was 6·0, and in Scotland 10·2 per cent. The highest rates, 5·7 and 4·6, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births registered in each of the eight Divisions in 1864, 1865, and 1866.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years 1864, 1865, and 1866, by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.			Proportion per cent. of Illegitimate Births.		
	1864.	1865.	1866.	1864.	1865.	1866.

South-Eastern,	94·9	94·9	94·4	5·1	5·5	4·6
South-Western,	97·5	97·9	97·7	2·4	2·5	2·5

40,002 births were registered during the quarter ended 31st March; 38,785 in that ended 30th June; 33,581 during that ended 30th September; and 33,722 in that ended 31st December.

DEATHS.

The deaths registered in 1866 amounted to 93,027, of which 46,140 were males, and 46,887 females, being in the proportion of 1·660 per cent. of

the *estimated* population, or in the ratio of 1 registered death to every 60 persons. The proportion in England for the same year was 2·361 per cent., or 1 in 42; and in Scotland 2·268 per cent., or 1 in 44.

The following table shows the per-centage of mortality at different ages:—

TABLE V.—*The Mortality per Cent. at each Age-period, according to the Registration of Deaths in Ireland, during the Years 1864, 1865, and 1866, by Sexes.*

Sexes.		AGES.											
		6—	8—	10—	12—	15—	20—	25—	30—	40—	50—	60—	75—
Males.	1864	28·45	4·33	2·92	7·67	6·19	5·78	7·76	11·51	12·39	10·11	2·17	·61

	1866	24·11	4·36	2·51	7·12	7·04	6·45	7·62	11·45	12·81	11·16	3·55	·52
Males and Females.	1864	26·69	4·28	2·34	7·24	6·37	5·91	7·78	11·66	12·02	10·68	2·16	·67
	1865	27·56	4·57	2·37	7·32	6·51	6·09	7·80	11·09	12·63	10·08	2·13	·67
	1866	26·03	4·73	2·49	7·14	6·86	6·18	7·73	11·19	12·94	10·66	2·27	·71

Of the persons whose deaths were registered during the year 26·03 in every 100 were children under 5 years old—of whom 27·99 per cent. were males, and 24·11 per cent. females. 18·93 per cent. of the men, and 15·54 per cent. of the women, whose deaths were registered had passed their 75th year. 58 of the males and 83 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

EMIGRATION.

During the year 1866 the number of emigrants who left the ports of Ireland amounted to 99,467; of these 59,561 were males and 39,906 females. Of the whole number 17,379, or 17·5 per cent., were from Leinster; 36,971, or 37·2 per cent., from Munster; 26,259, or 26·4 per cent. from Ulster; and 12,439, or 12·5 per cent., from Connaught: 6,419 persons, or 6·4 per cent., did not state the county or province to which they belonged.

Of the emigrants in 1866, 13·6 per cent. were under 15 years of age; 75·3 per cent. were 15 to 35 years old; 10·4 per cent. were 35 and upwards; and the ages of 7 per cent. were not specified in the returns.

METEOROLOGY.

The following is an abstract of the meteorological observations taken during the year 1866, at the Ordnance Survey Office,* Phoenix Park, Dublin, kindly furnished by Captain Wilkinson, R.E.

The barometer was highest during the year, at 9·30 A.M., on 24th January, when it stood at 30·673 inches, the wind blowing from S.W.; it was lowest on 23rd March, at 9·30 P.M., with the wind from S.E., when it was 28·663 inches.

The highest temperature in the air was 80·7°, on 13th July, and the lowest was 17·5°, on the 1st March.

Rain or snow fell on 216 days; the greatest rain-fall in 24 hours was ·975 in., on 18th June, with wind blowing N.W.; the total amount registered was 26·857 inches.

* Latitude 53° 21' 44·35" north; longitude 6° 21' 6·35" west. Height above the sea 126·6 feet. From the 1st January, 1865, inclusive, the barometer has been corrected for altitude, as well as reduced to 32° Fahrenheit.

The prevailing wind was from the W., from which point it blew on 107 days; it was from S.W. on 84 days; on 26 days from N.W.; on 38 days from S.; on 30 days from E.; on 17 days from S.E.; on 17 days from N.; on 13 days from N.E., at 9.30 A.M.; on 33 days the air was calm at that hour. The total pressure of the W. wind was 302.62 lbs., being an average of 2.83 lbs. per square foot. The strongest wind blew from S.W., on the 6th December, when the pressure was 25 lbs. per square foot.

I beg here to repeat the observations made in my Report to your Excellency for 1864, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state that the numbers of these events registered in 1866 do not show any improvement compared with previous years:—

“In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and

deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and in 1865 and 1866] :—

COUNTRIES.	RATIOS TO POPULATION.		
	Births.	Deaths.	Marriages.
IRELAND (in 1864),	1 in 42	1 in 61	1 in 207
IRELAND (in 1865),	1 in 39	1 in 61	1 in 183
IRELAND (in 1866),	1 in 38	1 in 60	1 in 185
England,	1 " 25	1 " 42	1 " 115
Scotland,	1 " 25	1 " 42	1 " 137
Sweden,	1 " 20	1 " 29	1 " 165
Prussia (Old Provinces),	1 " 24	1 " 38	1 " 114
Hanover,	1 " 20	1 " 45	1 " 124
Württemberg,	1 " 23	1 " 31	1 " —
Hanse Towns: Bremen,	1 " 23	1 " 37	1 " 105
Holland,	1 " 20	1 " 42	1 " 127
France,	1 " 28	1 " 41	1 " 127
Spain,	1 " 26	1 " 35	1 " 127
Austria (exclusive of Hungary),	1 " 25	1 " 31	1 " 121

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years :—

	1864.	1865.	1866.	1867.	1868.
Registered { Births,	156,414	144,970	146,090	144,215	146,196
Deaths,	93,146	95,154	95,627	93,911	96,802
Marriages,	27,406	29,803	30,121	30,736	27,732"

Following this Report are summaries of the Quarterly Reports issued in 1866, and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I have the honour to be

Your Excellency's

Very faithful servant,

WILLIAM DONNELLY,

Registrar-General.

GENERAL REGISTER OFFICE,

Dublin, 31st March, 1870.

SUMMARY OF THE QUARTERLY REPORTS, 1866.

First Quarter—January, February, March.

Quarterly
Reports.
—
First
Quarter.

Marriages.—The number of marriages registered in Ireland during the first three months of the year 1866 amounted to 11,992, equal to an annual ratio of 1 in every 116, or ·859 per cent. of the *estimated* population. The number registered during the corresponding period of 1865 was 12,308.

Of the 11,992 marriages registered during the first quarter of 1866, 9,681 were between Roman Catholics, representing an annual ratio of 1 marriage in every 112, or ·893 per cent. of the Roman Catholic population; and the remaining 2,311 marriages were between Protestants, being equal to an annual ratio of 1 in every 134, or ·745 per cent. of the Protestant population.

Births.—The births registered during the quarter ending on 31st March, 1866, amounted to 40,002 (20,577 boys and 19,425 girls), being equal to an annual ratio of 1 in every 34·9, or 2·87 per cent. of the *estimated* population; the number of births registered during the corresponding quarter of 1865 was 38,320, and in the first quarter of 1864 the number was 30,179.

Deaths.—The number of deaths registered in Ireland during the quarter amounted to 27,614 (13,575 males and 14,039 females), representing an annual ratio of 1 in every 50·5, or 1·98 per cent. of the *estimated* population. The number registered in the corresponding quarter of 1865 was 29,259, and in 1864 it was 28,043.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st March, 1866, amounted to 25,809—16,689 males and 9,120 females—being 9,961 more than the number who emigrated during the corresponding quarter of 1865.

The average number of emigrants from Ireland during the first three months of the years 1852 to 1865 was 21,745; the number for the first quarter of 1866 is, therefore, 4,064 in excess of the average.

As will be seen by the following statement, the number of emigrants who left the country during the first quarter of each year in which the Returns were obtained* varied to a very great extent; in the first quarter of 1852 the number was 45,434, in 1853 it was 36,912, in 1854 it was 31,620, in 1855 it fell to 19,572, and from that period in only one year (1857) reached 20,000, until the year 1863, when it rose from 11,495, in 1862, to 24,792; it further increased to 27,625, in 1864; it then fell to 13,848 for the first quarter of 1865, and, as has been already stated, amounted to 25,809 during the first quarter of 1866.

STATEMENT showing the number of Emigrants who left Ireland during the first three months of each of the years 1852 to 1866, inclusive, according to Returns received by the Registrar-General.

No. of Emigrants.		No. of Emigrants.		No. of Emigrants.	
First three months of 1856,	43,434	First three months of 1857,	20,000	First three months of 1862,	11,495
" 1853,	36,912	" 1858,	12,118	" 1863,	24,792
" 1854,	31,620	" 1859,	14,257	" 1864,	27,625
" 1855,	19,572	" 1860,	13,213	" 1865,	13,848
" 1856,	14,576	" 1861,	24,425	" 1866,	25,809

Estimated Decrease of the Population.—The number of births registered during the quarter ended 31st March, 1866, being 40,002; the deaths 27,614; and the number of emigrants 25,809 (according to the returns obtained by the enumerators at the several seaports);—a decrease of 13,421 would, therefore, appear to have taken place in the population during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4 lb. loaf for the first quarter of the year 1866 was 6½d., being one penny higher than the average price for the

* Returns of the Emigration from Ireland were first obtained by the Registrar-General in May, 1851.

Quarterly
Reports.
First
Quarter.

corresponding period of 1865. The price during the first three weeks of the first quarter of 1866 was 7d.; it was 6½d. during the remaining weeks. The price was 5½d. during the whole of the corresponding quarter of 1865.

The price of oatmeal at the Dublin Corn Exchange ranged from 15s. 6d. in the first week to 14s. 6d. per cwt. in the last week of the first quarter of 1866; the average price for the three months being 14s. 10d., against 11s. 9d. for the corresponding quarter of 1865.

The quotations for potatoes at the Potato Market, Dublin, were somewhat lower for the first quarter of 1866 than for the corresponding period of 1865; the averages for the former being 2s. 6d. to 3s. 6d., and for the latter 3s. 1d. to 3s. 7d. per cwt.

The average prices of beef at the Dublin Cattle Market were also lower during the first quarter of 1866, than during the first three months of 1865; the averages being 50s. 6d. to 63s. 6d. per cwt. for the former, and 54s. 6d. to 68s. for the latter.

The average number of persons in Ireland receiving indoor relief on Saturdays during the quarter was 57,133; the average for the corresponding quarter of the year 1865 was 62,418. The smallest number of persons (54,894) receiving indoor relief was on Saturday, in the first week of January; this was also the case in the corresponding quarter of 1865 and of 1864. The largest number receiving indoor relief during the first quarter of 1866 was in the first and second weeks of March. The number of persons (10,163) receiving outdoor relief was also smallest in the first week of the quarter; the weekly average for the quarter was 11,927, against 11,296 in the corresponding period of 1865.

Of the persons receiving indoor relief during the first quarter of the year 1866, an average number of 465 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1865 the average weekly number was 523.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the first quarter of the year 1866, was 29·521 inches (in the corresponding period of 1865, and of 1864 it was 29·651 inches, and 29·725 inches respectively); the highest reading (30·490 inches) was on the 24th January, at 9.30 A.M., wind S.W.; and the lowest (28·480 inches) on the 23rd March, at 9.30 P.M., wind S.E.

The mean temperature of the air during the quarter was 41·5° (during the corresponding period of 1865 it was 38·9°, and in 1864 it was 40·2°); the maximum registered by the thermometer (68·0°) was on the 30th March, and the minimum (17·5°) was on the 1st of the same month.

Rain or snow fell on 54 days during the quarter. The rain-fall measured 7·508 inches (it was 5·979 inches and 5·227 inches respectively during the corresponding quarters of 1865 and 1864). The greatest monthly rain-fall during the first quarter of 1866 was in March, when 3·309 inches were registered.

The wind blew on 47 days from S.W.; 13 days from N.W.; 7 days from W.; 6 days from S.E.; and 5 days from N.E., at 9.30 A.M.; on only one day during the three months did the wind blow from the East at that hour, and on only two days from the North. The air was calm on 4 days at 9.30 A.M.

HEALTH OF THE PEOPLE.

The deaths registered during the first quarter of 1866 were far below the number registered during the corresponding periods of the years 1864 and 1865.

Zymotic diseases, in general, proved less fatal than during the preceding periods; in some districts, however, especially those in which precautionary measures were neglected, fever, scarlatina, measles, &c., proved most destructive.

The Registrar of the Bandalstown District, Superintendent Registrar's District of Antrim, says, "I have had 21 cases of fever, while there have been registered

during the same period 7 deaths from it. The disease, I am sorry to say, has been on the increase for the last month, owing chiefly to my not having compulsory power to send such cases to the workhouse fever hospital. I saw to-day 6 fever cases in one cabin, and the head of the family refused to have them removed to hospital. *I should mention that the Guardians have a spring cart and bed for the conveyance of fever patients to hospital.*"

It would be well that the good example set by the Antrim Board of Guardians was more generally followed, as there can be no doubt that the poison of fever and other zymotic diseases is disseminated in consequence of fever patients being transmitted to hospital in cabs and other public conveyances.

In Belfast No. 4 District 49 deaths resulted from fever.

Scarlatina of a malignant character prevailed in the Keady District, Armagh Union; 5 healthy children in one family were cut off by this scourge. In the Bellaghy District, Magherafelt Union, scarlatina and its sequelæ proved fatal in 21 instances. In Mullingar District 27 deaths resulted from scarlatina. "I attribute to the filthy and uncleansed state of the back streets in this town." In Ennistimon scarlatina was very prevalent, but comparatively mild; this disease was also rife in Wexford, Galway, Westport; and of the 50 deaths registered in the Achill District (Newport Union) 21 were ascribed to scarlatina. The disease, however, had disappeared from many districts where it had been epidemic.

Mensles and whooping cough were very prevalent.

In Coleraine there were nine deaths from small-pox; in Arklow (Rathdrum Union) out of 78 deaths registered during the quarter, no less than 35 were caused by small-pox! Deaths from this disease also occurred in the Districts of Cappaghduff (Ballinrobe Union), Ballymoney, &c. *It is much to be regretted that the Registrars of those districts in which fatal cases of small-pox were registered, were unable to state whether those who fell victims to this disease had been previously vaccinated.*

Bronchitis and other pulmonary affections proved very fatal, especially to the aged and the very young. The Registrar of the Portadown District (Lurgan Union) records a case of "pure Asiatic" cholera which proved fatal in 15 hours. Two deaths "from cholera" were registered in the Newtownards District.

While some of the Registrars were enabled to report favourably of the sanitary state of their districts, the majority complained loudly of the want of all sanitary precautions, especially the Registrars of Portrush, Bellaghy (Magherafelt Union), Ardara (Glenties Union), Kilskeer (Kells Union), Mullingar, and Carrick-on-Suir.

Those who fail to adopt such precautionary measures as have been over and over again recommended with a view to the improvement of the public health may see, when it is too late, the dire results of their negligence.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS

Into which Ireland has been divided for Statistical purposes.

Marriages.—The marriage rate during the quarter ending 31st March, 1866, was highest in the "South-Western" and "Western" Divisions, and lowest in the "Eastern" Division. This was also the case in the first quarter of 1865.

The order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Marriages registered during the first quarter of the years 1865 and 1866 is shown in the following Statement:—

Quarter ending 31st March, 1865.			Quarter ending 31st March, 1866.		
Divisions.	Ratio to Population.		Divisions.	Ratio to Population.	
1. South-Western,	1 in 74		South-Western,	1 in 77	
2. Western,	81		Western,	81	
3. South-Eastern,	106		South-Eastern,	117	
4. North Midland,	109		North-Western,	123	
5. North-Western,	123		North-Eastern,	147	
6. South Midland,	130		North Midland,	153	
7. North-Eastern,	146		South Midland,	157	
8. Eastern,	170		Eastern,	164	

Quarterly
Reports.
—
First
Quarter.

Births.—The birth-rate, during the first quarter of the year 1866, in the "South-Western" Division, was 1 in 30; this was higher than the rate in any of the other divisions. The "South-Western" Division had also the highest birth-rate for the first quarter of 1865 and of 1864.

The "South-Midland" Division, which ranked *third* for the first quarter of 1864, had the lowest birth-rate for the first quarter of 1865, as well as for the corresponding period of 1866.

The "North-Western" has improved its position as to birth-rate; it came eighth (or last) for the first quarter of 1864; and sixth for the corresponding quarter of 1865 and 1866.

The "North-Eastern" Division, which was fourth for the first quarter of 1864, occupied the second place for the corresponding period in 1865, and maintained its position for the first quarter of 1866.

The "Western" Division was seventh for the first quarter of 1864; fifth for the corresponding period of 1865; and third for the first quarter of 1866.

The numerical order of the Eight Divisions as regards the annual Rate represented by the number of Births registered during the First quarter of 1864, 1865, and 1866, is shown in the following Statement:—

Quarter ending 31st March,					
1864.		1865.		1866.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. South-Western, . . .	1 in 37	South-Western, . . .	1 in 33	South-Western, . . .	1 in 30
2. South-Eastern, . . .	" 37	North-Eastern, . . .	" 31	North-Eastern, . . .	" 30
3. South Midland, . . .	" 47	South-Eastern, . . .	" 37	Western, . . .	" 35
4. North-Eastern, . . .	" 47	Eastern, . . .	" 37	South-Eastern, . . .	" 35
5. Eastern, . . .	" 48	Western, . . .	" 38	Eastern, . . .	" 37
6. North Midland, . . .	" 62	North-Western, . . .	" 40	North-Western, . . .	" 37
7. Western, . . .	" 65	North Midland, . . .	" 41	North Midland, . . .	" 39
8. North-Western, . . .	" 66	South Midland, . . .	" 42	South Midland, . . .	" 41

Deaths.—The rate of mortality was not so high in any of the divisions during the first quarter of the year 1866, as it was during the corresponding period of 1865.

The "Eastern" Division had the highest rate of mortality (1 in 41) for the first quarter of 1866; it had also the highest rate (1 in 40) for the corresponding quarter of 1865; it ranked second for the first quarter of 1864, when its death-rate was 1 in 43. The North-Eastern Division came second, and the South-Eastern third, as regards rate of mortality, for the first quarter of 1866. These three divisions had the highest rates of mortality for the first quarter in each of the years 1864, 1865, and 1866.

The Western Division came last for each of the quarters just mentioned; the average rate of mortality therein for the first quarter of 1866 was 1 in 64; it is, however, but right to state that many of the Unions or Superintendent Registrars' Districts had a much higher rate than this, and that this low ratio for the division is produced by the extraordinarily low ratios afforded by the deaths registered in some of the Unions.

The following Statement shows the Eight Divisions arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the First quarter of 1864, 1865, and 1866:—

Quarter ending 31st March,					
1864.		1865.		1866.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.

PROVINCES.

Quarterly Reports.

First Quarter.

Marriages.—The number of marriages registered during the first quarter in the Province of Connaught affords an annual ratio of 1 in 84 of the population; in Munster the ratio was 1 in 87; in Ulster 1 in 148; and in Leinster 1 in 171.

The following Table shows, by PROVINCES, the number of Marriages registered during the First quarter of the years 1864, 1865, and 1866, together with the annual ratio to the estimated Population.

REGISTRATION PROVINCES	MARRIAGES.					
	Quarter ending 31st March,					
	1864.		1865.		1866.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	1,803	1 in 188	2,137	1 in 154	2,308	1 in 171
MUNSTER,	3,110	" 159	4,354	" 81	4,549	" 87
ULSTER,	2,315	" 374	3,025	" 155	3,143	" 148
CONNAUGHT,	1,015	" 116	1,222	" 88	2,598	" 84
TOTAL,	8,243	1 in 128	10,738	1 in 116	11,558	1 in 116

Births.—The number of births registered in the Province of Munster during the first quarter of 1866 afforded the highest birth-rate, viz., 1 in 33; this province had also the highest birth-rate for the first quarter of 1865 and 1864; in Ulster and Connaught the birth-rate during the first quarter of 1866 was 1 in 34, and in Leinster it was only 1 in 39.

Deaths.—The rate of mortality during the quarter was highest in Leinster, viz., 1 in 44; in Ulster it was 1 in 50; in Munster, 1 in 53; and in Connaught, 1 in 63.

The following Table shows, by PROVINCES, the number of Births and Deaths registered during the First quarter of the years 1864, 1865, and 1866, together with the ratio to the estimated Population.

Second Quarter.—April, May, June.

Second Quarter.

Marriages.—The number of marriages registered in Ireland during the second quarter of the year 1866 amounted to 6,081, equal to an annual ratio of 1 in every

Quarterly Report. 230, or 436 per cent. of the *estimated* population. The number registered in the corresponding period of 1865 was 5,659.

Second Quarter. Of the 6,081 marriages registered during the second quarter of 1866, 3,970 were between Roman Catholics, representing an annual ratio of 1 marriage in 273, or 366 per cent. of the Roman Catholic population; and the remaining 2,111 marriages were between Protestants, being equal to an annual ratio of 1 in every 147, or 680 per cent. of the Protestant population.

Births.—There were 38,785 births registered in Ireland during the quarter ending 30th June, 1866—19,883 boys and 18,902 girls—representing an annual ratio of 1 in every 360, or 2.78 per cent. of the *estimated* population; the births registered during the corresponding quarter of 1865 were 39,109, and in 1864 they were 38,715.

Deaths.—The deaths registered in Ireland during the second quarter of 1866 amounted to 24,023—12,150 males and 12,473 females—affording an annual ratio of 1 in every 567, or 1.76 per cent. of the *estimated* population. The numbers registered during the corresponding quarters of 1864 and 1865 were 24,155 and 24,250 respectively.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 30th June, 1866, amounted to 41,124—24,331 males and 16,793 females—being 3,536 more than the number who emigrated during the corresponding quarter of 1865.

Estimated Decrease of the Population.—The number of births registered during the quarter ended 30th June, 1866, being 38,785; the deaths 24,023; and the number of emigrants 41,124—(according to the returns obtained by the enumerators at the several seaports); a decrease of 26,962 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The price of Messrs. Maudslays and Co.'s 4 lb. loaf during the first twelve weeks of the second quarter of 1866 was 6½d., being one halfpenny higher than the price through the entire of the corresponding quarter of 1865; it was raised to 7d. during the last week of the quarter.

The average price of oatmeal for the second quarter of 1866 was 15s. 8d. per cwt.; it rose from 14s. 6d. per cwt. in the first week of the quarter to 16s. 6d. in the last week; the average price for the corresponding quarter of 1865 was 14s. 1d.

The average prices of potatoes during the quarter at the Dublin Potato Market were 3s. 1d. to 3s. 11d. per cwt., differing very slightly from the averages for the corresponding quarter of 1865.

The prices of beef at the Dublin Cattle Market during the quarter ending 30th June last, ranged from 55s. to 80s. per cwt., the average for the quarter being 58s. to 72s. 6d.; the average prices for the corresponding quarter of 1865 were only 55s. to 67s. 6d. per cwt.

The average number of persons in Ireland receiving indoor relief on Saturdays during the three months ending 30th June, 1866, was 51,404, against 54,852 for the corresponding period of 1865. On Saturday in the first week of the quarter the number was 51,810; on Saturday in the last week the number had decreased to 48,444.

The average weekly number of persons receiving outdoor relief during the quarter was 11,932, against 10,565 for the second quarter of 1865.

Of the persons receiving indoor relief during the second quarter of 1866 an average number of 466 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1865 the average weekly number was 475.

THE WEATHER.

Quarterly
Reports.
—
Second
Quarter.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the second quarter of 1866 was 29·761 inches (in the corresponding quarter of 1865 and 1864 it was 29·916 inches, and 29·838 inches respectively); the highest reading (30·277 inches) was on the 23rd April, at 9.30 A.M., wind S.W.; and the lowest (29·252 inches) on the 18th June, at 3.30 P.M., wind N.W.

The mean temperature of the air during the quarter was 51·5° (in the corresponding quarter of 1865 it was 54·8°, and in the second quarter of 1864 it was 53·6°); the maximum temperature (79·8°) was on the 28th June, and the minimum (39·0°) was on the 4th April.

Rain or snow fell on 48 days during the quarter. The rain-fall measured 7·796 inches; in the corresponding quarters of 1865 and 1864 it was 5·816 inches and 4·083 inches respectively. The greatest monthly rain-fall was in June, when 3·652 inches were registered.

The wind blew on 27 days from S.W.; 14 days from N.E.; 13 days from E.; 11 days from N.W.; 9 days from W.; and 7 days from S.E., at 9.30 A.M.; on no day during the quarter did the wind blow from the south at that hour. The air was calm on 7 days at 9.30 A.M.

HEALTH OF THE PEOPLE.

The state of the public health during the quarter was generally satisfactory, though the number of deaths registered was in excess of the number registered during the corresponding period of 1865.

The low temperature, combined with the harsh easterly winds which prevailed during the months of April and May, rendered pulmonary affections among young and old extremely fatal, and to these causes must be referred the greater mortality during the quarter as compared with the corresponding periods of 1864 and 1865.

There was in most districts an absence of epidemic or zymotic diseases, and, save in some exceptional instances, the deaths from scarlatina, fever, measles, small-pox, &c., had notably diminished.

The Registrar of the Mohill District (Mohill Union), in referring to a malignant type of scarlatina in his locality, makes the following observations:—"It is a remarkable fact that all the fatal cases occurred under almost similar circumstances in *badly ventilated and filthy houses, where the poor sufferers had to breathe a foul and vitiated atmosphere*; in many instances the pigs and patients occupied the same apartments. In families of 9 or 10 attacked at the same time, *where attention was paid to cleanliness and ventilation, not one fatal case took place*." The Registrar of the Mullingar District (Mullingar Union) says that of 22 deaths from scarlatina, which were registered during the quarter, "all occurred in the town, none in the country portions of the district, showing clearly the evil of the filthy and uncleaned state of the back streets of this town." In many of the districts from which scarlatina had disappeared, the Registrars attributed the subsidence of the epidemic to improved sanitary arrangements.

It is satisfactory to find that no deaths from small-pox occurred in the Arklow District (Rathrum Union) during the quarter, as in the quarter ended March 31st, the alarming number of 35 deaths from small-pox had been registered in that district. In the Ballymonoy District a child aged 3 months (*not vaccinated*) died from small-pox. In Summerhill District (Trim Union) the Registrar notes that "two deaths from small-pox were registered in the past quarter, one in the person of an infant lately brought from Dublin, the second an adult, *neither of whom had been vaccinated*."

Three deaths from small-pox occurred in the Boyle District; the Registrar

Quarterly
Reports.
—
Second
Quarter.

makes no reference to vaccination. With a view of demonstrating the protective powers of vaccination, the Registrar of Arthurstown Sub-district, Fethard (New Ross Union), relates the following interesting particulars:—"A sailor returned from a foreign voyage to his native village, Ballyhack, and in a few days after was seized with small-pox in its confluent and most virulent form. The village swarms with a population steeped in poverty, and is in every way badly calculated to resist the extension of a contagious disease. The man's residence was in its centre, and segregation from its neighbours impossible. Vaccination, however, had been for years carefully attended to; an infant residing in the house had been vaccinated only a few weeks before. The man recovered, and although two months have gone by, there has not been another case of small-pox amongst the inhabitants."

Fever was generally of a milder type.

The number of Registrars who refer to the improved sanitary condition of their districts increases every quarter. It is to be hoped that the ample powers which the new Sanitary Act affords for suppressing nuisances and protecting the public against the spread of contagious diseases may soon be brought into action, so that the evils at present existing, and which have been so forcibly described by the Registrars, may be neutralized.

In the Scotstown District (Mounghan Union) 2 cases of English cholera were registered in the month of June, both having proved fatal within 48 hours; two other members of the same family were attacked, but recovered. In the Malin District (Inishowen Union) a case of English cholera proved fatal in 15 hours.

Some of the persons whose deaths were registered during the quarter had attained very advanced periods of life; thus in the Templemartin District (Bandon Union) "the death of a person aged 106 was registered;" in Anghnacloy District (Clogher Union) the death of a person aged 104 was registered; and the deaths of centenarians were also registered in Shinrone (Roscrea Union) and Ballycastle.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The marriage-rate during the quarter ending 30th June, 1866, was highest in the "North-Eastern" and "Eastern" Divisions; the "South-Eastern" came next. The order in which these divisions ranged was the same in the corresponding quarter of 1865.

The order of the Eight Divisions as regards the annual Rate represented by the number of Marriages registered during the Second quarter of the years 1865 and 1866 is shown in the following Statement:—

Quarter ending 30th June, 1865.		Quarter ending 30th June, 1866.	
Divisions.	Ratio to Population.	Divisions.	Ratio to Population.
1. North-Eastern,	1 in 151	North-Eastern,	1 in 164
2. Eastern,	174	Eastern,	164
3. South-Eastern,	234	South-Eastern,	203
4. South-Western,	266	South-Western,	261
5. North-Western,	307	North-Western,	263
6. South Midland,	324	South Midland,	300
7. North Midland,	355	North Midland,	312
8. Western,	421	Western,	337

Births.—The highest birth-rate attained in any of the divisions during the second quarter of the years 1864, 1865, and 1866, was 1 in 31. This was the rate

for the "North-Eastern" in 1865 and 1866. The "South Midland" ranked sixth as to birth-rate during the second quarter of 1864; it fell to seventh place in the corresponding quarter of 1865, and to eighth or last place for the second quarter of 1866, the ratios for this division being 1 in 40, 42, and 43 respectively, for the three periods named.

Reports.
Second
Quarter.

The numerical order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Births registered during the SECOND quarter of 1864, 1865, and 1866, is shown in the following Statement:—

Quarter ending 30th June,					
1864.		1865.		1866.	
Division.	Ratio.	Division.	Ratio.	Division.	Ratio.
1. South-Western, .	1 in 32	North-Eastern, .	1 in 31	North-Eastern, .	1 in 31
2. North-Eastern, .	" 33	South-Western, .	" 32	South-Western, .	" 32

8. North-Western, .	" 42	Western, .	" 43	South Midland, .	" 43

Deaths.—The death rate in the "Eastern" Division during the quarter ending 30th June, 1866, was 1 in 45. This is the highest rate of mortality which has occurred during the second quarter of the year in any division since registration commenced in Ireland. The number of deaths registered in the "Western" Division during the quarter represents an annual ratio of only 1 in 76: in the corresponding quarter of 1861 and 1865, the rate afforded was 1 in 77 and 75 respectively.

The following statement shows the EIGHT DIVISIONS arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the SECOND quarter of 1864, 1865, and 1866:—

Quarter ending 30th June,					
1864.		1865.		1866.	
Division.	Ratio.	Division.	Ratio.	Division.	Ratio.
1. South-Eastern, .	1 in 43	Eastern, .	1 in 40	Eastern, .	1 in 45

PROVINCES.

Marriages.—The number of marriages registered in the Province of Leinster during the quarter ending 30th June, 1866, affords an annual ratio of 1 in 194; in Ulster, 1 in 199; in Munster, 1 in 201; and in Connaught, 1 in 309.

Quarterly
Reports.
—
Second
Quarter.

The following Table shows, by PROVINCES, the number of Marriages registered during the Second quarter of the years 1864, 1865, and 1866, together with the annual ratio to the estimated Population.

REGISTRATION PROVINCES.	MARRIAGES.					
	Quarter ending 30th June,

Deaths.—The deaths registered in the Province of Leinster during the three months ending 30th June, 1866, afford an annual ratio of 1 in 49; in Ulster, 1 in 54; in Munster, 1 in 62; and in Connaught, 1 in 76.

Third
Quarter.

Third Quarter.—July, August, September.

Marriages.—The number of marriages registered in Ireland during the third quarter of 1866 amounted to 5,566, equal to an annual ratio of 1 in every 251, or 399 per cent. of the estimated population. The number registered in the corresponding period of 1865 was 5,854.

Of the 5,566 marriages registered during the third quarter of 1866, 3,509 were between Roman Catholics, representing an annual ratio of 1 marriage in

every 309, or .324 per cent. of the Roman Catholic population; and the remaining 2,057 marriages were between Protestants, being equal to an annual ratio of 1 in every 151, or .663 per cent. of the Protestant population.

Births.—There were 33,581 births registered in Ireland during the quarter ending 30th September, 1866—17,327 boys and 16,254 girls—representing an annual ratio of 1 in every 41.6, or 2.41 per cent. of the *estimated* population; the births registered during the corresponding quarter of 1865 were 34,045, and in 1864 they were 33,877.

Deaths.—The deaths registered in Ireland during the third quarter of the year 1866 amounted to 18,600—9,383 males and 9,217 females—affording an annual ratio of 1 in every 75.0, or 1.33 per cent. of the *estimated* population. The numbers registered during the corresponding quarters of 1864 and 1865 were 19,191 and 18,632 respectively.

Immigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 30th September, 1866, amounted to 19,640—11,447 males and 8,193 females—being 8,031 less than the number who emigrated during the corresponding quarter of 1865.

Estimated Decrease of the Population.—The number of births registered during the quarter ended 30th September, 1866, being 33,581; the deaths 18,600; and the number of emigrants 19,640 (according to the returns obtained by the enumerators at the several seaports); a decrease of 4,660 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4lb. loaf for the third quarter of 1866 was 6½d. (being one halfpenny more than the average for the corresponding quarter of 1865); the price was 7d. during the first four weeks of the quarter, and 6½d. during the remaining nine weeks.

The average price of oatmeal for the third quarter of 1865 was 15s. 3d.; for the corresponding quarter of 1866 it was 15s. 8d.; the average price was highest (16s. 6d.) in the third week of the quarter, and lowest (14s. 6d.) in the eighth week; the average price in the last week was 15s., against 14s. 3d. in the corresponding week of 1865.

The average prices of potatoes for the quarter, at the Dublin Potato Market, were 3s. 8d. to 5s. 2d., being much bigger than the average prices for the corresponding quarter of 1865, viz., 2s. 8d. to 4s.

The average price of inferior beef at the Dublin Cattle Market, during the third quarter of 1866, was 52s., which was lower than the average price (56s. 6d.) for the corresponding quarter of 1865; best beef, however, was higher during the third quarter of 1866 than in the third quarter of 1865, the average price for the former being 69s. 6d., and for the latter 67s. 6d.

The average number of persons in Ireland receiving indoor relief on Saturdays during the third quarter of 1866 was 44,980, against 46,632 for the corresponding period of 1865.

The average weekly number of persons receiving outdoor relief during the quarter was 10,870, against 9,093 for the third quarter of 1865.

Of the persons receiving indoor relief during the third quarter of 1866, an average number of 451 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1865 the average weekly number was 463.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the third quarter of the year 1866, was 29.628 inches (in the corresponding quarter of 1865 and 1864 it was 29.620 inches, and 29.604 inches

Quarterly
Reports.
—
Third
Quarter.

respectively); the highest reading (30·186 inches) was on the 10th July, at 9.30 p.m., when the air was calm; and the lowest (28·946 inches) on the 7th August, at 9.30 a.m., wind S.W.

The mean temperature of the air during the quarter was 56·9° (it was 60·8° in the corresponding quarter of 1865, and 57·8° in the third quarter of 1864); the maximum temperature (80·7°) was on the 13th July, and the minimum (31·8°) was on the 29th September.

Rain or snow fell on 56 days during the quarter. The rain-fall measured 6·666 inches; it was 6·318 inches in the third quarter of 1865, and 4·137 inches in the corresponding quarter of 1864. The total rain-fall during the half-year ended 30th September 1866, was 14·452 inches, against 12·134 inches and 5·220 inches during the corresponding period of 1865 and 1864, respectively. The greatest monthly rain-fall in the third quarter of 1866 was in September, when 2·988 inches were registered.

The prevailing winds during the quarter were westerly, the wind having been from W. on 27 days; from S.W. on 32 days; and from N.W. on 11 days, at 9.30 a.m. The air was calm on 6 days at that hour.

HEALTH OF THE PEOPLE.

Notwithstanding the outbreak of cholera in various parts of the country, the deaths registered during the third quarter of 1866 were 32 less than the number registered during the corresponding quarter of 1865.

Fever, though prevalent in some districts, was generally of a mild type, and caused comparatively few deaths.

Deaths from scarlatina of a malignant nature were reported from various districts, especially Carrickfergus, Castlederg, Lurgan, Ballieborough, and Larna. The Registrar of Ballinakill, Superintendent Registrar's District of Abbeycix, reported 14 deaths from scarlatina; he made the following statement:—"I have been for over thirty years the Medical Officer of Ballinakill Dispensary, but never experienced so bad a type of scarlatina as the present epidemic afforded." At Kilsnash, 12 deaths from scarlatina were reported. In many districts this disease had disappeared, or very much decreased, especially in those localities where attention had been paid to sanitary precautions.

About 30 Registrars reported cases of cholera having occurred in their districts; in nearly every instance those who were first attacked by the disease had been recently in localities where cholera abounded. Reapers and labourers arriving from England were attacked in various parts of the country; and, generally speaking, the disease was not confined to the individual first attacked, but spread to the other inmates of the house. In Mallow, where 26 deaths from cholera took place during the quarter, the Registrar states that "the greater number of cases occurred in the locality of a well, the water of which was in daily use by the people dwelling in its neighbourhood. This water has been since analysed by Professor Cameron of Dublin. His opinion is that the water is not suitable for consumption, in consequence of its containing a very large amount of organic matter derived from animal sources. The people have been warned of the consequences of using it. I may remark that this well is not the celebrated spa of Mallow, which spa is in daily use by far the larger portion of the town."

The Registrar of the Carrick-on-Suir District, who had so frequently reported on the unsatisfactory sanitary condition of his district, makes the following statement:—"The health of this district is at present most satisfactory. The sanitary condition of the town is now being improved, owing to the exertions of the Town Commissioners since the 'Sanitary Act, 1866,' came into force." The Registrar of Milltown Malbay, Superintendent Registrar's District of Ennistimon, testifies to the advantages of sanitary improvements; referring to the disappearance or subsidence of fever and scarlatina in his district, he observes:—"More perfectly

organized sanitary arrangements have confessedly brought about this disappearance of diseases, epidemic or endemic." Quarterly Reports.

Whooping-cough was very prevalent and very fatal in the Cavan Union.

A death from hydrophobia took place in the Clady District, Londonderry Union; and in the Boherboy District, Kanturk Union, a child 16 months old died from the same cause. Third Quarter.

The ages of 3 women who died at Oranmore, Galway Union, were stated to have been 86, 90, and 102, respectively. In the Ballymacally District, Killadysert Union, the deaths of 6 persons, aged between 80 and 101, were reported. In Tobercurry, 5 deaths from old age were reported, including a sailor 106 years old, "who served under Lord Nelson at Trafalgar."

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The number of marriages registered in the Eastern Division during the third quarter of 1866, afforded the highest annual ratio, viz.:—1 in 163 of the estimated population; in the North-Eastern Division the ratio was 1 in 173; in the North-Western Division the ratio was only 1 in 369; and in the Western Division 1 in 501.

The order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Marriages registered during the THIRD quarter of the years 1865 and 1866, is shown in the following statement:—

Quarter ending 30th September, 1865.			Quarter ending 30th September, 1866.		
Divisions.	Ratio.		Divisions.	Ratio.	
1. Eastern,	1 in 157		Eastern,	1 in 163	
2. North-Eastern,	164		North-Eastern,	173	
3. South-Eastern,	240		South-Eastern,	265	
4. South-Western,	281		South-Western,	279	
5. North-Western,	314		South Midland,	315	
6. South Midland,	320		North Midland,	344	
7. North Midland,	333		North-Western,	369	
8. Western,	473		Western,	501	

Births.—The "North-Eastern" Division had the highest birth-rate during the quarter ending 30th September, 1866, 1 in 36; the "South-Midland" had the lowest, 1 in 52; these divisions held the same rank for the corresponding quarter of 1865.

The numerical order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Births registered during the THIRD quarter of 1864, 1865, and 1866, is shown in the following Statement:—

Quarter ending 30th September,					
1864.		1865.		1866.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. Eastern,	1 in 28	North-Eastern,	1 in 26	North-Eastern,	1 in 36

6. North Midland,	46	North Midland,	48	South-Eastern,	45
7. South Midland,	47	North-Western,	48	North-Western,	52
8. North-Western,	44	South Midland,	47	South Midland,	52

Quarterly
Reports.
Third
Quarter.

Deaths.—The rate of mortality, during the third quarter of the year 1866, was highest in the "Eastern" Division, 1 in 55; in the corresponding quarter of 1865 the rate in this division was 1 in 59, and in the third quarter of 1864 it was 1 in 63.

The number of deaths registered in the "Western" Division, during the quarter of the year under consideration, only affords an annual ratio of 1 in 102; this division had also the lowest death-rate in the corresponding quarter of 1864 and 1865.

The following Statement shows the EIGHT DIVISIONS arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the Third quarter of 1864, 1865, and 1866:—

Quarter ending 30th September,					
1864.		1865.		1866.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.

Deaths.—The deaths registered in the Province of Leinster during the quarter ending the 30th September, 1866, represent an annual ratio of 1 in 61; in Ulster, 1 in 77; in Munster, 1 in 78; and in Connaught, 1 in 102.

Fourth Quarter.—October, November, December.

Fourth
Quarter

Marriages.—There were 6,483 marriages registered in Ireland during the fourth quarter of 1866, affording an annual ratio of 1 in every 218, or 464 per cent. of the estimated population. Of this number 4,051 were between Roman Catholics, representing a ratio of only 1 marriage in every 268, or 374 per cent. of Roman Catholics, and 2,431 were between Protestants, affording a ratio of 1 in every 128, or 783 per cent. of the Protestant population. The number of marriages registered in the corresponding quarter of 1865 was 6,981, and in the fourth quarter of 1864 the number was 6,209.

Births.—There were 33,722 births registered in Ireland during the quarter ending 31st December, 1866—17,308 boys and 16,414 girls—representing an annual ratio of 1 in every 41.4, or 2.42 per cent. of the estimated population; the births registered during the corresponding quarter of 1865 were 33,496, and in 1864 they were 33,643.

Deaths.—The deaths registered in Ireland during the fourth quarter of the year 1866 amounted to 22,190—11,032 males and 11,158 females—affording an annual ratio of 1 in every 62.8, or 1.59 per cent. of the estimated population. The numbers registered during the corresponding quarters of 1864 and 1865 were 21,755 and 21,013 respectively.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st December, 1866, amounted to 12,894—7,094 males and 5,800 females—being 7,506 less than the number who emigrated during the corresponding quarter of 1865.

Estimated Decrease of the Population.—The number of births registered during the quarter ended 31st December, 1866, being 33,722; the deaths 22,190; and the number of emigrants 12,894—(according to the returns obtained by the enumerators at the several seaports)—a decrease of 1,362 would, therefore, appear to have taken place in the population of Ireland during that period.

Quarterly
Reports.
Fourth
Quarter.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Mauders and Co.'s 4 lb. loaf for the fourth quarter of 1866 was 7½d. (being one halfpenny more than the average for the corresponding quarter of 1865); the price was 8d. during the last five weeks of the quarter, against 7d. during the corresponding weeks of the previous year.

The average price of oatmeal for the quarter ending 31st December, 1866, was 15s. 11d. per cwt.; the average price for the corresponding quarter of 1865 was 15s. 1d. The average price was only 16s. in the first week, it was 17s. 3d. in the ninth week, and 16s. 6d. in the last week of the quarter.

The average prices of potatoes per cwt., at the Dublin Potato Market, for the fourth quarter of 1866, were 3s. 1d. to 4s. 11d.; for the corresponding quarter of 1865 the prices ranged from 2s. 9d. to 3s. 8d.

Beef of inferior quality (at the Dublin Cattle Market), averaged a lower price for the last quarter of 1866, than for the corresponding quarter of 1865, the averages being respectively, 48s. 6d., and 50s. 6d. per cwt.; whereas, best beef sold at higher prices during the fourth quarter of 1866 than during the corresponding period in 1865, the average price for the former three months being 67s., and for the latter 63s. 6d. per cwt.

The average number of persons in Ireland receiving indoor relief on Saturdays during the fourth quarter of 1866 was 48,534, against 49,457 for the corresponding period of 1865.

The average weekly number of persons receiving outdoor relief during the quarter was 11,217, against 8,859 for the fourth quarter of 1865.

Of the persons receiving indoor relief during the fourth quarter of 1866 an average number of 443 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in External Hospitals; in the corresponding quarter of 1865 the average weekly number was 460.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the fourth quarter of 1866, was 29.773 inches (in the corresponding quarter of 1865 and 1864 it was 29.674 inches, and 29.686 inches respectively); the highest reading (30.389 inches) was on the 8th October, at 9.30 A.M., wind N.N.E.; and the lowest (29.692 inches) was on the 6th December, at 9.30 P.M., wind S.W.

The mean temperature of the air during the last quarter of 1866 was 46.4° (it was 46.5° in the fourth quarter of 1865, and 44.4° in the corresponding period of 1864); the maximum temperature (65.9°) was on the 21st October, and the minimum (21.8°) was on the 31st December.

Rain or snow fell on 58 days during the quarter. The rain-fall was unusually light, having only measured 4.897 inches, while it was 10.112 inches and 12.040 inches respectively in the corresponding quarters of 1865 and 1864. The greatest monthly rain-fall in the last quarter of 1866 was in December, when 1.832 inches were registered.

Though the rain-fall was so small, westerly winds were very prevalent during the quarter, the wind having been from that point on 37 days; on 22 days from S.W.; on 3 days from N.W.; on 7 days from S.E.; on 4 days from S.; on 2 days from N.E.; and on one day from N., at 9.30 A.M. The air was calm on 16 days at that hour.

HEALTH OF THE PEOPLE.

During the quarter ended December 31st, the deaths were 1,177 in excess of those registered in the corresponding period of 1865. The increased mortality.

was mainly attributable to Asiatic cholera, which was, as testified by the Registrars, in most instances imported into their districts. In some localities this disease proved most fatal; thus in Bray, out of 98 deaths registered no less than 68 were ascribed to cholera, and 3 to diarrhoea; surely there must have been something very deficient in the sanitary arrangements of this town, to account for a mortality from cholera even greater than that in the east end of London. In Bray scarlatina had been heretofore a prevailing epidemic. In the Registrar's District of Arklow, Rathdrum Union, or Superintendent Registrar's District, where cholera had been directly imported by a sailor labouring under the disease, the Registrar enumerated 75 deaths from cholera out of 131 deaths, and he added that, "The sanitary state of Arklow is in a most unsatisfactory condition; the same state of overcrowding, habitations, deficient sewerage, and want of pure water, as existed previous to the recent outbreak of cholera, and for the past thirteen years, the extent of the time of my residence here as Medical Officer to the Arklow Dispensary District."

In one part of the town of Carlow (Graiguo), 77 deaths resulted from cholera: the Registrar makes no reference to the sanitary condition of that locality. In Limerick cholera proved very fatal. In many instances deaths from cholera were ascribed to other diseases; the lower classes, having a horror of speedy burials and the loss of "wakes," assigned the cause of death to anything save cholera.

The Registrar of Enniscorthy, No. 2, says, "Cholera and diarrhoea very prevalent at present in this district; a great desire amongst the poor to remain at home in preference to going to hospital, and if possible to keep the disease secret."

In the Bantry Registrar's District, Bantry Union, a man arrived from Cork labouring under cholera, and died; he communicated the disease to 4 others, of whom 3 died. Four cases of cholera occurred at Glengarriff, 2 proving fatal; the Registrar states that "the contagion was distinctly traced from the city of Cork."

The following note from the Registrar of Tartaraghan, Superintendent Registrar's District of Lurgan, demands special attention; the more so, as the Poor Law Commissioners require that the medical officers of dispensaries in Ireland should be thoroughly qualified as midwifery practitioners. The Commissioners, also, in many cases, send through the country respectable women, educated at the Rotundo Lying-in Hospital, to attend upon the poor in their hour of need.

The Registrar referred to states that "Floodings are frequent, and uterine diseases prevail to a large extent, owing to the brutal manner in which females are treated by uneducated women attending as midwives, and the quantity of whiskey they consume during parturition. An accurate return of the number of deaths, or cause of death (especially infantile), is quite impossible, a Medical and Registrar's certificate of the cause of death not being required before interment."

Fever and scarlatina were less fatal than usual, and wherever either prevailed, there defective sanitary arrangements existed, and by way of illustration, the report of the Registrar of the Cookstown District may be referred to; he states that, "In November and December we were visited by a severe epidemic of fever; 15 cases were entered in the Dispensary Relief Register alone; the majority of these patients resided in a block of houses, filthy, wretchedly ventilated, and badly covered, with manure heaps and a large cesspool in the rear." The Registrar states, that since his report to the Town Commissioners, matters are "in a fair sanitary condition." Again, in Skull District (Superintendent Registrar's District, Skull), the Registrar reports that "Four young women died of low continued fever (3 in one family), where pure air was inaccessible, and filth abounded internally and externally."

Every report testifies to the benefits resulting from the Compulsory Vaccination Act: only 10 deaths from small-pox were recorded in the fourth quarter. The Registrar of Coalisfinn District (Strahane Union), makes the following satisfactory statement:—"There has not been a fatal case from small-pox recorded since the Registration Act came into force; the fact speaks for itself." Similar testimony is borne to the successful operation of the Act by the Registrar of Whitechurch District (Dungarvan Union), who says, "I have had but 2 cases of small-pox in

Quarterly
Reports.
Fourth
Quarter.

my district for the last three years, and they were of a mild type, which I attribute to the success attending the working of the Compulsory Vaccination Act."

Bronchitis and other chest affections proved very fatal to the aged, and those of tender years. Of the former many had long passed the three score and ten years. For instance, the reported age of a man who died in Magherafelt was 102 years; a farmer died in Omagh District, whose age was stated to have been 120 years; a woman died in the Angharkey District (Clogher Union), at the age of 98, the assigned cause of death being paralysis. The Registrar of the Finnera District (Granard Union), states that some deaths "were registered at an advanced age; one beyond a century by several years;" and in the Cong District (Ballinrobe Union), one death was registered, the age stated being 104 years.

The publication of the Registrars' notes appears to have had a salutary effect, for in their notes on this quarter some of the Registrars whose districts had been, in a sanitary point of view, utterly neglected, advert to their improved condition; amongst these districts may be mentioned Newtownards (Newtownards Union), Swords (Balrothery Union), Milltown Malbay (Ennistimon Union), and Loughrea. Though many Registrars still complain, it is satisfactory to perceive that some progress in the right direction has been achieved. It is needless to add, how desirable it would be to have in all localities, especially in these densely populated, highly educated and efficient officers of health.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The North-Eastern Division had the greatest number of marriages registered in proportion to its population during the last quarter of the year 1866, the annual ratio being 1 in 131. In the Eastern Division the ratio was 1 in 163. These two Divisions also ranked first and second respectively in the corresponding quarters of 1864 and 1865. In the Western Division the ratio was only 1 in 426. The low ratio is to be accounted for by the large proportion of the Roman Catholic marriages being celebrated in the first quarter of the year.

The order of the Eight Divisions as regards the annual Rate represented by the number of Marriages registered during the Fourth quarter of the years 1864, 1865, and 1866, is shown in the following Statement:—

Quarter ending 31st December,					
1864.		1865.		1866.	
<i>Divisions.</i>	<i>Rates.</i>	<i>Divisions.</i>	<i>Rates.</i>	<i>Divisions.</i>	<i>Rates.</i>
1. North-Eastern, . . .	1 in 148	North-Eastern, . . .	1 in 126	North-Eastern, . . .	1 in 131
2. Eastern, . . .	174	Eastern, . . .	159	Eastern, . . .	163

8. Western, . . .	444	Western, . . .	263	Western, . . .	426

Births.—The Births registered during the last quarter of 1866 in the North-Eastern Division amounted to 7,430, affording an annual ratio of 1 in 36 of the estimated population; in the corresponding quarter of 1865 the ratio was 1 in 37;

and in 1864 it was 1 in 38; in the South Midland Division the ratio afforded was only 1 in 52 in 1866 and 1865 against 1 in 50 for the corresponding period of 1864.

Quarterly
Reports.
Fourth
Quarter.

The order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Births registered during the Fourth quarter of 1864, 1865, and 1866, is shown in the following Statement:—

Quarter ending 31st December,					
1864.		1865.		1866.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. North-Eastern, . . .	1 in 38	North-Eastern, . . .	1 in 37	North-Eastern, . . .	1 in 36
2. Western, . . .	39	Western, . . .	40	Western, . . .	37
3. Eastern, . . .	40	South-Western, . . .	40	South-Western, . . .	39
4. South-Western, . . .	42	Eastern, . . .	43	Eastern, . . .	43
5. North-Western, . . .	46	North-Western, . . .	43	South-Eastern, . . .	45
6. South-Eastern, . . .	47	North Midland, . . .	45	North Midland, . . .	46
7. North Midland, . . .	47	South-Eastern, . . .	46	North-Western, . . .	44
8. South Midland, . . .	50	South Midland, . . .	52	South Midland, . . .	52

Deaths.—The Eastern Division had the highest death-rate during the fourth quarter of 1866, the annual ratio afforded being 1 in 40 of the estimated population; in the corresponding quarter of 1865 the death-rate in this division was 1 in 51, and in 1864 it was 1 in 54. In the North Midland Division the deaths registered during the fourth quarter of 1866 represent an annual rate of 1 in 78 against 1 in 83 for the fourth quarter of 1865, and 1 in 80 for the fourth quarter of 1864; in the North-Western Division the ratio was 1 in 88 against 1 in 78 for 1864, and 1 in 84 for 1865; and in the Western it was only 1 in 92 against 1 in 86 for the corresponding quarter of 1864, and 1 in 90 for 1865.

The following Statement shows the EIGHT DIVISIONS arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the Fourth quarter of 1864, 1865, and 1866:—

Quarter ending 31st December,					
1864.		1865.		1866.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. Eastern, . . .	1 in 54	Eastern, . . .	1 in 51	Eastern, . . .	1 in 40

8. Western, . . .	92	Western, . . .	90	Western, . . .	92

PROVINCES.

Marriages.—The number of marriages registered in the province of Ulster during the fourth quarter of 1866 amounted to 2,842, a number representing an annual ratio of 1 in every 164 of the estimated population; in Leinster the number was 1828, or 1 in 188; in Munster 1,932, or 1 in 299; and in Connaught 580, or only 1 in 377.

Quarterly
Reports.
Fourth
Quarter.

The following Table shows, by PROVINCES, the number of Marriages registered during the Fourth quarter of the years 1864, 1865, and 1866, together with the annual ratio to the estimated Population:—

REGISTRATION PROVINCES.	MARRIAGES.					
	Quarter ended 31st December,					
	1864.		1865.		1866.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	1,701	1 in 160	1,960	1 in 157	1,828	1 in 151
MUNSTER,	1,370	" 223	1,391	" 220	1,522	" 226

CONNAUGHT,	606	" 373	684	" 338	560	" 377
TOTAL,	6,333	1 in 236	6,351	1 in 208	6,752	1 in 215

Births.—The births (7,458) registered in Leinster during the fourth quarter of 1866 afford an annual ratio of only 1 in 46 of the estimated population—in the corresponding quarter of 1865 the ratio was 1 in 47, and in 1864, 1 in 45. In Munster there were registered 8,729 births—a number equal to an annual ratio of 1 in 42 (the ratio for the fourth quarter of 1864 and 1865 respectively being 1 in 43); in Ulster the number was 11,711, or 1 in 40 which was also the ratio for the corresponding quarters of 1864 and 1865; and in Connaught 5,824, or 1 in 37, against 1 in 39 for 1865, and 1 in 41 for 1864.

The following Table shows, by PROVINCES, the number of Births and Deaths registered during the quarters ending 31st December, 1864, 1865, and 1866, and the ratio to the estimated Population:—

REGISTRATION PROVINCES.	BIRTHS.						DEATHS.					
	Quarter ending 31st December,						Quarter ending 31st December,					
	1864.		1865.		1866.		1864.		1865.		1866.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	7,613	1 in 45	7,427	1 in 47	7,426	1 in 45	6,070	1 in 58	6,022	1 in 57	7,344	1 in 46
MUNSTER,	8,616	42	8,710	43	8,729	42	5,791	68	5,491	68	5,459	67
ULSTER,	11,740	49	11,729	40	11,711	49	7,426	65	6,909	67	6,759	69
CONNAUGHT,	8,480	41	8,620	39	5,824	37	2,659	82	2,591	88	2,329	91
TOTAL,	33,643	42	35,486	42	33,722	41	21,755	65	21,012	67	25,190	68

Deaths.—There were 7,544 deaths registered in the province of Leinster during the fourth quarter of 1866, the annual ratio afforded being 1 in 46—in the fourth quarter of 1865 the ratio was 1 in 57, and in 1864 it was 1 in 58. In Munster there were registered 5,488 deaths, or 1 in 67 of the estimated population, against 1 in 68 for the corresponding quarter of 1865, and 1 in 65 for the fourth quarter of 1864; in Ulster, 6,759 or 1 in 69, against 1 in 67 in 1865, and 1 in 65 in 1864; and in Connaught, 2,399, or only 1 in 91, against 1 in 88 for the fourth quarter of 1865, and 1 in 83 for 1864.

TOPOGRAPHICAL DESCRIPTION of the EIGHT DIVISIONS into which IRELAND has been divided in the foregoing TABLES.

No. I. The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II. The North-Western Division is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III. The Eastern Division is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV. The North Midland Division is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulak, in the county of Roscommon, on its western.

No. V. The South Midland Division, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Berris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty Mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI. The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Bee-wee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portlanna.

No. VII. The South-Eastern Division.—This division extends from its junction with the "Eastern" division southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the South Midland division. It embraces the county of Waterford; nearly the whole of the county of Wexford; parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork County.

No. VIII. The South-Western Division extends along the southern and western coasts from Cork Harbour to the river Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port)
estimated to the middle of each of the Years 1801 to 1866 :—

Middle of the Years	Estimated POPULATION.			Middle of the Years	Estimated POPULATION.			Middle of the Years	Estimated POPULATION.		
	Persons.	Males.	Females.		Persons.	Males.	Females.		Persons.	Males.	Females.
1801	5,216,329	2,591,758	2,624,571	1823	6,084,509	3,437,071	2,647,438	1845	8,294,061	4,083,843	4,210,218

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841.—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1861.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; the difference between the number arrived at by this computation and the actual number by the Census of 1851 was divided over the intervening years in proportion to the number of recorded deaths and the number of emigrants.

1862 to 1864.—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and apportioning the difference as explained for the last period.

1865 to 1866.—The English birth and death rates, as above, were employed in the calculations for each year deducting the number of emigrants according to the returns received by the Registrar-General for Ireland.

ANNUAL ABSTRACTS
OF
MARRIAGES, BIRTHS, AND DEATHS.
1866.

ABSTRACT OF MARRIAGES.—Marriages registered in Ireland, pursuant to the

DIVISIONS AND SUPERINTENDENT REGISTRARS' DISTRICTS.*	AREA in Statute Acres, exclusive of the River, Lakes, and Tideways.	Popula- tion, 1865.	TOTAL MARRIAGES.	MARRIAGES,

* See note (i) page 2.

NOTE.—Whenever the minus sign (—) is prefixed to the number in the column headed "Excess of Births over Deaths," it denotes that the Births in the Superintendent Registrar's District, instead of exceeding the Deaths, were, in fact, less than the Deaths, to the extent stated.

* The Registration Counties consist of groups of Superintendent Registrar's Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the Registration Counties differ more or less from the Civil Parishes.

† See note (1) page 2.

* For remainder of Belfast see next page.

Note.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths, to the extent stated.

IRELAND.—SUPPLEMENTARY TABLE of the

[In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 114 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a few persons, or diseases which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction

* The Registration Counties consist of groups of Superintendent Registrar's Districts or Poor Law Unions. Wherever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the Registration Counties differ more or less from the Civil Counties.

LETTER to the REGISTRAR-GENERAL on the CAUSES of DEATH in IRELAND,
from WILLIAM M. BURKE, F.C.P.I.

YEAR 1866.

SIR,

I have the honour of submitting to you a few observations on the assigned causes of the deaths registered in Ireland during the year 1866.

It is noteworthy that, notwithstanding an epidemic visitation of cholera, the mortality during the year was somewhat less than in the year preceding.

I. ZYMOTIC DISEASES.

The number of deaths caused by Zymotic diseases amounted to 19,626—9,855 males, 9,771 females—showing a decrease of 176 as compared with the preceding year. Of the total deaths recorded, 1 in every 4·7 resulted from diseases of this class.

Fever caused 4,218—2,184 males and 2,034 females—or 1 in every 23·1 of the total deaths. The mortality from fever during the preceding year exceeded that of the year 1866 by 1,065.

Scarlet fever killed 3,501 persons—1,876 males and 1,625 females—of these, 2,003 were under 5 years of age, and 1,061 were aged between 5 and 10 years.

Of the deaths from all causes, 1 in every 26·6 resulted from scarlet fever.

The deaths consequent on the epidemic of Asiatic cholera amounted to 2,501—1,167 males, and 1,334 females,—or 1 in 37·2 of the total deaths.

The number of deaths from diarrhoea amounted to 1,911—973 males and 938 females—or 1 in 48·7 of the total deaths. Of the persons who died from diarrhoea 816 were under 5 years of age, and 691 were 55 years and upwards.

Whooping cough was the cause of 1,736 deaths—763 males and 968 females,—or 1 in every 53·6 of all the deaths. Nearly all the deaths from whooping cough occurred in children under 5 years of age: 2 females whose deaths were referred to whooping cough were stated to be aged between 25 and 35 years, and a man and a woman between 35 and 45 years.

Croup was the cause of 1,390 deaths—718 males, and 672 females. This disease appears to have been more prevalent in Ireland than in either England or Scotland in the year 1866, the ratios to the total number of deaths registered being in Ireland 1 in 67; in Scotland 1 in 79; and in England only 1 in 97.

851 deaths were referred to measles—464 males, and 387 females. The number registered in 1863 was 1,036, and in 1864, 630.

Diphtheria was the cause of 317 deaths, against 480 in 1865, and 661 in 1864. Of the deaths registered from diphtheria 111 occurred in the North-Eastern Division, and 88 in the Eastern Division.

The deaths from small-pox only amounted to 194, showing a decrease of 267 as compared with the year 1865, and being 660 less than in 1864.

Three males and 1 female died from hydrophobia.

The deaths of 3 men were caused by glanders; in the preceding year 9 men died from this disease; and in the year 1864, 3 men and 1 woman died from the same cause.

II. CONSTITUTIONAL DISEASES.

The number of deaths from diseases termed constitutional amounted to 17,462—8,290 males and 9,172 females—affording a ratio of 1 in every 5·3 of the total deaths registered.

Phthisis, or pulmonary consumption, proved fatal in 10,119 instances—4,835 males and 5,284 females—being in the proportion of 1 death in every 9·2 of all the deaths.

1,762 deaths—723 males, and 1,039 females—were returned under the head of dropsy.

Cancer killed 1,694 persons—703 males, and 991 females.

1,466 deaths were referred to tabes mesenterica.

Hydrocephalus, or water on the brain, was the cause of 1,060 deaths—598 males and 462 females.

1,090 deaths were ascribed to scrofula.

III. LOCAL DISEASES.

The deaths attributed to local diseases numbered 31,380, or 1 in every 3 of all the deaths, the sexes being 16,774 males and 14,606 females.

To diseases of the nervous system 8,795 deaths were referred, the sexes being 4,840 males, and 3,955 females. Of these, 4,067 (2,270 males and 1,787 females) were returned as caused by convulsions; apoplexy caused 972 (563 males and 409 females); paralysis caused 1,756 (906 males and 850 females); cephalitis, or inflammation of the brain, &c., contributed 610 (342 males, 268 females). 805 deaths were tabulated under the head of brain disease unspecified; in 1865 the number so tabulated was 799, and in 1864 it was 1,182.

Diseases of the circulatory organs caused 3,168 deaths—1,696 males and 1,472 females; of these, 66 deaths (39 males and 27 females,) resulted from pericarditis; 100 were caused by aneurism (81 males and 19 females); 3,002 deaths (1,576 males and 1,426 females,) were returned under the head of heart disease unspecified.

Diseases of the respiratory organs, not including phthisis, caused 12,851 deaths—6,533 males and 6,318 females. Bronchitis was the cause of 8,959 deaths (4,366 males and 4,593 females); inflammation of the lungs proved fatal in 1,892 instances (1,145 males and 747 females); asthma was the assigned cause of 657 deaths; pleurisy of 402; and laryngitis of 112; to lung disease unspecified 829 deaths were referred.

Diseases of the digestive organs caused 4,894 deaths—2,637 males, 2,257 females. Of this number, inflammation of the bowels caused 663 deaths (368 males, and 294 females); 268 persons died from peritonitis (142 males, and 126 females); gastritis, or inflammation of the stomach, is stated to have caused 198 deaths;

ileus, which includes obstruction of the bowels, constipation, &c., caused 403 deaths (249 males and 154 females); 1,239 deaths were ascribed to stomach disease unspecified. To inflammation of the liver 243 deaths were referred; to jaundice 194; and to liver disease unspecified 1,005.

Diseases of the urinary organs proved fatal in 1,096 instances—844 males and 252 females. Of this number, inflammation of the kidneys caused 50 deaths; nephria, or Bright's disease, 198; stone in the bladder 23; inflammation of the bladder 52; diabetes 124; and kidney disease unspecified 564.

170 persons died from diseases of the generative organs.

Diseases of the organs of locomotion caused 172 deaths—103 males and 69 females.

234 deaths were ascribed to diseases of the integumentary system, viz., 9 to phlegmon; 82 to ulcer; and 143 to skin disease, &c.

IV. DEVELOPMENTAL DISEASES.

Diseases incidental to development contributed 18,443 deaths—7,782 males, 10,660 females—the proportion being 1 in 5 of the total deaths registered; 255 died from premature birth; cyanosis caused 13 deaths, of these, 11 were under 1 year old, 1 was 2 years old, and the other between 10 and 15 years. *Spina bifida* was the cause of 12 deaths; 26 deaths were tabulated under the head of "other malformations;" and teething was the cause assigned for 299 deaths.

667 women died in childbirth; as 328 women died from metris, or puerperal fever, so the total deaths resulting from child-bearing will amount to 995. For every 147 children born, the life of 1 mother was sacrificed.

The cause of 13,282 deaths was stated to have been old age; the sexes were, 5,525 males, and 7,757 females.

3,873 deaths were referred to atrophy and debility.

V. VIOLENT DEATHS.

The deaths from violence registered during the year amounted to 2,162—1,423 males and 739 females, or 1 in every 43 of the total deaths registered. In every 10,000 of the estimated population in 1866, 4 persons died from violence.

Of the deaths from violence, 1,889 were accidental, viz., 682 from fractures and contusions; 23 from gunshot wounds; 30 from cuts or stabs; 505 from burns or scalds—218 males and 287 females; 29 from poisoning; 464 from drowning—361 males, and 103 females; 72 from suffocation. In each of the two preceding years the number of deaths from suffocation was 71. Of the 72 persons whose deaths were caused by suffocation, 30 were under 12 months old. The nature of the accident was not stated in 84 instances, against 140 in the year 1865.

The number of deaths from homicide amounted to 140—80 males, and 60 females.

67 persons—45 males and 22 females—committed suicide, or 12 out of 1,000,000 of the estimated population were self-destroyed.

The modes resorted to for self-destruction were—gunshot wounds, 1 man; cuts or stabs, 1 man and 1 woman; poisoning, 2 men and 1 woman; drowning, 15 men and 12 women; hanging, 18 men and 4 women; and in the cases of 8 men and 4 women the mode of self-destruction was not stated in the returns.

Two men, between 20 and 25 years of age, were executed.

Sixty-four of the violent deaths were not classed.

In 504 cases of sudden death, the cause was not ascertained.

The cause of death was unspecified or ill-defined in 3,461 instances, or 1 in 27 of the total deaths. This evidences an improvement in the returns on the years 1864 and 1865, when the number of deaths unspecified were 6,504, or 1 in 14·3, and 4,853, or 1 in 19·2 respectively.

I have the honour to be,

Sir,

Your obedient servant,

W. M. BURKE.

To

The Registrar-General.

COPY of CIRCULAR relating to REGISTRATION of MARRIAGES celebrated by the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31st December, 1865.

Sir,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with six *blank Forms* of Certificates of Marriage, which you will carefully take from the Certificate Book forwarded to you, and also with six of the printed Envelopes, addressed to “The Registrar of Births, Deaths, and Marriages.”

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A *further supply* of Certificates *will be forwarded on your application*—from which *blank Forms* will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates to give you a receipt for them, (on the accompanying Forms), in order that you may be able to account to me for all the Certificates entrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked paper*, with the words “Certificate of Marriage” printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,

Your obedient Servant,

WILLIAM DONNELLY,

Registrar-General.

To

*The Registrar of
Births, Deaths, and Marriages.*

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "Abstract of Marriages" to the Superintendent Registrar's District, numbered 15 (see page 4), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX OF REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the order in which it appears in the Arrangement of the Districts in the Tables of Abstracts; thus Abbey (120: 4) is the 4th Registrar's District of the Tams Superintendent Registrar's District, No. 120.]
